Education

Ph.D. Applied Economics, Pennsylvania State University	2025 (Expected)
M.S. Civil Engineering, Zhejiang University	Dec. 2019
B.E. Civil Engineering, Zhejiang University	Jun. 2016

Research Interests

Energy and Environmental Economics, Urban Economics, Labor Economics, Empirical Industrial Organization, Causal Inference, Machine Learning

Teaching Fields

Microeconomics, Econometrics, Energy and Environmental Economics, Urban Economics, Geographic Information Systems, Empirical Industrial Organization, Machine Learning

Job Market Paper

Drought responses in the Western United States: Household location choice and housing market feedback.

Abstract: The Western U.S. confronts a paradoxical challenge: rapid population growth amidst increasingly severe droughts, leading to a severe water crisis. This study employs a residential sorting model to analyze household location decisions and the associated welfare implications in response to drought risk from 2000 to 2020. A key contribution is the use of novel unmet water demand data that, for the first time, integrates the legal dimension of water allocation—water rights—with water availability. The findings reveal that households require significant compensation to move to areas with greater water scarcity. On average, households expect a 0.06% increase in annual wages to tolerate an additional cubic meter of unmet water demand, with those over 40 and homeowners demanding even higher compensation. The welfare impact on households is primarily driven by the direct disutility of water shortages rather than by housing cost shocks. These insights will effectively guide policies that tackle adaptation and equity concerns in the face of climate change.

Presentations

- 2024 Association of Environmental and Resource Economists Summer Conference, Western Economic Association International Annual Conference, Agricultural & Applied Economics Association Annual Meeting, CU Environmental and Resource Economics Workshop, Penn State Water Conference, Penn State Energy and Environmental Economics and Policy Initiative Seminar
- 2023 Association of Environmental and Resource Economists Summer Conference, Western Economic Association International Annual Conference, Cornell Northeast Workshop on Energy Policy and Environmental Economics
- 2022 Environmental Politics and Governance Conference

Research Experience

- Pennsylvania State University, Research Assistant for Karen Fisher-Vanden 2021-present
 - o As part of the Program on Coupled Human and Earth Systems, I collaborated with an interdisciplinary team to study the impact of energy and environmental risks and policies on labor and housing markets. Working alongside economists, modelers, policy experts, and lawyers, I drew on diverse perspectives and expertise to address complex economic challenges.

Teaching Experience

- CED 201: Introductory Environmental and Resource Economics. Douglas H. Wrenn. Spring 2024
Teaching Assistant and Guest Lecturer
- EMCH 210: Statics and Strength of Materials. Samia Suliman. Spring 2021

Teaching Assistant

EMCH 212: Dynamics. Christopher Kube.

Fall 2020

Teaching Assistant

EMCH 212: Dynamics. Gary Gray.

Spring 2020

Teaching Assistant

Professional Experience

Food and Agriculture Organization of the United Nations (FAO)

Feb. 2019-Nov. 2019

Specialist

Rome, Italy

- o Worked with a multidisciplinary team to develop a predictive model for estimating greenhouse gas emissions in tea production, laying the foundation for FAO's carbon-neutral tea certification.
- o Collaborated with the German Federal Ministry for Economic Cooperation and Development and the Chinese Academy of Agricultural Sciences to transfer tea planting technology to Kenya.
- o Supported small-scale farmers in rural Honduras in adopting sustainable agronomic practices and green energy solutions to strengthen their resilience to climate change.
- o Coordinated with national focal points to collect and synthesize statistics related to the Sustainable Development Goals, supporting global sustainability efforts to alleviate poverty and achieve zero hunger.

Scholarships and Awards

Graduate Student Travel Award, Pennsylvania State University

2024

Longenecker Award, Pennsylvania State University

2020

Outstanding Graduates, Zhejiang University

2016

Corporate Scholarships for Outstanding Students, Enterprises

2015/2017/2018

Service

Reviewer

- o Western Economics Association International Annual Conference

2024

Member

- o Penn State Energy, Environmental, and Food Economics Graduate Student Association

2022-present

- o Penn State Water Council

2023-present

- o Penn State Alumni Association-Blue & White Society

2020-2023

Skills

Software: Python, R, MATLAB, Stata, ArcGIS, GAMS, Java

Certifications: Supervised Machine Learning: Regression and Classification (Stanford), Advanced Learning Algorithms (Stanford), Unsupervised Learning, Recommenders, Reinforcement Learning (Stanford), SQL for Data Science (UC Davis)

Languages: English (fluent), Mandarin (native)
