## Education

---

Ph.D. Energy, Environmental, and Food Economics, Pennsylvania State University	2025 (Expected)
M.S. Civil Engineering, Zhejiang University	Dec. 2019
B.E. Civil Engineering, Zhejiang University	Jun. 2016

## Research Interests

---

Environmental and Energy Economics, Urban Economics, Labor Economics, Empirical Industrial Organization, Causal Inference

## Teaching Fields

---

Microeconomics, Econometrics, Environmental and Energy Economics, Urban Economics, Geographic Information Systems, Applied Computational Economics, Empirical Industrial Organization, Supervised Machine Learning

## Job Market Paper

---

**Drought responses in the Western United States: Household location choice and housing market feedback.**

*Abstract:* The Western U.S. is grappling a paradoxical challenge: rapid population growth amidst increasingly severe droughts, resulting in a severe water crisis. This study uses a residential sorting model to analyze household location decisions and the welfare implications in response to drought risk from 2000 to 2020. A key innovation is the use of novel unmet water demand data that, for the first time, integrates the legal dimension of water allocation—water rights—with water availability. Our findings show that households require significant compensation to move to areas with greater water scarcity. On average, they expect a 0.06% increase in annual wages to tolerate an additional cubic meter of unmet water demand. Notably, households over 40 and homeowners demand even higher compensation. This welfare impact is primarily driven by the direct disutility of water shortages rather than by housing cost shocks. These insights can help guide policies addressing adaptation and equity concerns in the face of climate change.

## Presentations

---

- 2024 AERE Summer Conference; WEAI Annual Conference; AAEA Annual Meeting; CU Environmental and Resource Economics Workshop; Penn State Water Conference; Penn State Energy and Environmental Economics and Policy Initiative Seminar
- 2023 AERE Summer Conference; WEAI Annual Conference; Cornell Northeast Workshop on Energy Policy and Environmental Economics
- 2022 Environmental Politics and Governance Conference

## Research Experience

---

- Pennsylvania State University, Research Assistant for Karen Fisher-Vanden 2021-Present
- o Conducted interdisciplinary research with the Program on Coupled Human and Earth Systems, focusing on the effects of drought on labor and housing markets in the Western U.S.

## Teaching Experience

---

- CED 201: Introductory Environmental and Resource Economics. Douglas H. Wrenn. Spring 2024  
*Teaching Assistant and Guest Lecturer*
- EMCH 210: Statics and Strength of Materials. Samia Suliman. Spring 2021  
*Teaching Assistant*
- EMCH 212: Dynamics. Christopher Kube. Fall 2020  
*Teaching Assistant*
- EMCH 212: Dynamics. Gary Gray. Spring 2020

## Professional Experience

---

Food and Agriculture Organization of the United Nations HQs

Feb. 2019-Nov. 2019

*Intern*

- o Contributed to a carbon-neutral tea project in collaboration with the German Federal Ministry for Economic Cooperation and Development and the Chinese Academy of Agricultural Sciences, assisting in the transfer of tea planting technology to Kenya.
- o Supported a rural community project in Honduras focused on enhancing farmers' climate resilience.

## Scholarships and Awards

---

Graduate Student Travel Award, Pennsylvania State University

2024

Longenecker Award, Pennsylvania State University

2020

Outstanding Graduates, Zhejiang University

2016

Corporate Scholarships for Outstanding Students, Enterprises

2015/2017/2018

## Service

---

Penn State Energy, Environmental, and Food Economics Graduate Student Association

2022-present

Penn State Water Council

2023-present

Penn State Alumni Association - Blue & White Society

2020-2023

## Skills

---

Software: Python, R, MATLAB, Stata, ArcGIS, GAMS, Java

Languages: English (fluent), Mandarin (native)
