## Education

---

Ph.D. Energy, Environmental, and Food Economics, Pennsylvania State University	2025 (Expected)
M.S. Civil Engineering, Zhejiang University	Dec. 2019
B.E. Civil Engineering, Zhejiang University	Jun. 2016

## Research Interests

---

Energy and Environmental Economics, Urban Economics, Labor Economics, Empirical Industrial Organization, Causal Inference

## Teaching Fields

---

Microeconomics, Econometrics, Energy and Environmental Economics, Urban Economics, Geographic Information Systems, Applied Computational Economics, Empirical Industrial Organization, Machine Learning

## Job Market Paper

---

### **Drought responses in the Western United States: Household location choice and housing market feedback.**

*Abstract:* The Western U.S. faces a paradoxical challenge: rapid population growth amidst increasingly severe droughts, leading to a severe water crisis. This study employs a residential sorting model to analyze household location decisions and the associated welfare implications in response to drought risk from 2000 to 2020. A key innovation is the use of novel unmet water demand data that integrates the legal dimension of water allocation—water rights—with water availability for the first time. The findings reveal that households require significant compensation to move to areas with greater water scarcity. On average, they expect a 0.06% increase in annual wages to tolerate an additional cubic meter of unmet water demand, with households over 40 and homeowners demanding even higher compensation. The welfare impact is primarily driven by the direct disutility of water shortages rather than by housing cost shocks. These insights can inform policies addressing adaptation and equity concerns in the face of climate change.

## Presentations

---

- 2024 Association of Environmental and Resource Economists Summer Conference, Western Economic Association International Annual Conference, Agricultural & Applied Economics Association Annual Meeting, CU Environmental and Resource Economics Workshop, Penn State Water Conference, Penn State Energy and Environmental Economics and Policy Initiative Seminar
- 2023 Association of Environmental and Resource Economists Summer Conference, Western Economic Association International Annual Conference, Cornell Northeast Workshop on Energy Policy and Environmental Economics
- 2022 Environmental Politics and Governance Conference

## Research Experience

---

- Pennsylvania State University, Research Assistant for Karen Fisher-Vanden 2021-present
- o Collaborated with an interdisciplinary team of modelers, hydrologists, and lawyer in the Program on Coupled Human and Earth Systems to study the impacts of drought on labor and housing markets in the Western U.S.

## Teaching Experience

---

- CED 201: Introductory Environmental and Resource Economics. Douglas H. Wrenn. Spring 2024  
*Teaching Assistant and Guest Lecturer*
- EMCH 210: Statics and Strength of Materials. Samia Suliman. Spring 2021  
*Teaching Assistant*

## Professional Experience

---

Food and Agriculture Organization of the United Nations HQs Feb. 2019-Nov. 2019  
*Intern*

- o Worked with a multidisciplinary team to develop a predictive model for estimating greenhouse gas emissions in tea production, laying the foundation for FAO's carbon-neutral tea certification.
- o Collaborated with the German Federal Ministry for Economic Cooperation and Development and the Chinese Academy of Agricultural Sciences, facilitating the transfer of carbon-neutral tea planting technology to Kenya.
- o Supported small-scale farmers in a rural Honduran community by implementing best agronomic practices designed to enhance their resilience and adaptability to the challenges posed by climate change.
- o Coordinated with national focal points to collect and synthesize statistics related to the Sustainable Development Goals, supporting global sustainability efforts to alleviate poverty and achieve zero hunger.

## Scholarships and Awards

---

Graduate Student Travel Award, Pennsylvania State University	2024
Longenecker Award, Pennsylvania State University	2020
Outstanding Graduates, Zhejiang University	2016
Corporate Scholarships for Outstanding Students, Enterprises	2015/2017/2018

## Service

---

Referee

- o Western Economics Association International Annual Conference 2024

Member

- o Penn State Energy, Environmental, and Food Economics Graduate Student Association 2022-present
- o Penn State Water Council 2023-present
- o Penn State Alumni Association-Blue & White Society 2020-2023

## Skills

---

Software: Python, R, MATLAB, Stata, ArcGIS, GAMS, Java

Certifications: Supervised Machine Learning: Regression and Classification (Stanford), Advanced Learning Algorithms (Stanford), Unsupervised Learning, Recommenders, Reinforcement Learning (Stanford), SQL for Data Science (UC Davis)

Languages: English (fluent), Mandarin (native)
