Education

Ph.D. Energy, Environmental, and Food Economics, Pennsylvania State University	2025 (Expected)
M.S. Civil Engineering, Zhejiang University	Dec. 2019
B.E. Civil Engineering, Zhejiang University	Jun. 2016

Research Interests

Environmental and Energy Economics, Urban Economics, Labor Economics, Empirical Industrial Organization, Causal Inference

Teaching Fields

Microeconomics, Econometrics, Environmental and Energy Economics, Urban Economics, Geographic Information Systems, Applied Computational Economics, Empirical Industrial Organization, Supervised Machine Learning

Job Market Paper

Drought responses in the Western United States: Household location choice and housing market feedback.

Abstract: The Western U.S. is grappling a paradoxical challenge: rapid population growth amidst increasingly severe droughts, resulting in a severe water crisis. This study uses a residential sorting model to analyze household location decisions and the welfare implications in response to drought risk from 2000 to 2020. A key innovation is the use of novel unmet water demand data that, for the first time, integrates the legal dimension of water allocation—water rights—with water availability. Our findings show that households require significant compensation to move to areas with greater water scarcity. On average, they expect a 0.06% increase in annual wages to tolerate an additional cubic meter of unmet water demand. Notably, households over 40 and homeowners demand even higher compensation. This welfare impact is primarily driven by the direct disutility of water shortages rather than by housing cost shocks. These insights can help guide policies addressing adaptation and equity concerns in the face of climate change.

Presentations

- 2024 AERE Summer Conference; WEAI Annual Conference; AAEA Annual Meeting; CU Environmental and Resource Economics Workshop; Penn State Water Conference; Penn State Energy and Environmental Economics and Policy Initiative Seminar
- 2023 AERE Summer Conference; WEAI Annual Conference; Cornell Northeast Workshop on Energy Policy and Environmental Economics
- 2022 Environmental Politics and Governance Conference

Research Experience

- Pennsylvania State University, Research Assistant for Karen Fisher-Vanden 2021-Present
- o Conducted interdisciplinary research with the Program on Coupled Human and Earth Systems, focusing on the effects of drought on labor and housing markets in the Western U.S.

Teaching Experience

- | | |
|---|-------------|
| CED 201: Introductory Environmental and Resource Economics. Douglas H. Wrenn.
<i>Teaching Assistant and Guest Lecturer</i> | Spring 2024 |
| EMCH 210: Statics and Strength of Materials. Samia Suliman.
<i>Teaching Assistant</i> | Spring 2021 |
| EMCH 212: Dynamics. Christopher Kube.
<i>Teaching Assistant</i> | Fall 2020 |
| EMCH 212: Dynamics. Gary Gray. | Spring 2020 |

Professional Experience

Food and Agriculture Organization of the United Nations HQs

Feb. 2019-Nov. 2019

Intern

- o Contributed to a carbon-neutral tea project in collaboration with the German Federal Ministry for Economic Cooperation and Development and the Chinese Academy of Agricultural Sciences, assisting in the transfer of tea planting technology to Kenya.
- o Supported a rural community project in Honduras focused on enhancing farmers' climate resilience.

Scholarships and Awards

Graduate Student Travel Award, Pennsylvania State University

2024

Longenecker Award, Pennsylvania State University

2020

Outstanding Graduates, Zhejiang University

2016

Corporate Scholarships for Outstanding Students, Enterprises

2015/2017/2018

Service

Referee

- o Western Economics Association International Annual Conference

2024

Member

- o Penn State Energy, Environmental, and Food Economics Graduate Student Association

2022-present

- o Penn State Water Council

2023-present

- o Penn State Alumni Association - Blue & White Society

2020-2023

Skills

Software: Python, R, MATLAB, Stata, ArcGIS, GAMS, Java

Languages: English (fluent), Mandarin (native)
